Soichiro Honda had a simple idea to make outboard engines cleaner, quieter and friendlier towards aquatic life – he made them 4-stroke. It was a solution that made Honda pioneers in marine engine technology, but more importantly it made us more responsible towards this fragile environmental resource. 4-stroke pioneers . The leader in 4-stroke engine technology for 50 years. Engineering for ...

The early development of the screw propeller. Propeller geometry. The propeller environment. The ship wake field, propeller performance characteristics.
James Goodfellow was fired from the police force for repeatedly sleeping on the job but his passion to be a detective was stronger than his narcolepsy so he went into business with his own private investigation agency. His first client required her burgled gems to be recovered which led to the discovery of a strangled woman at East Steading station. James is consequently drawn into a lethal web of deceit and murder that can threaten Europe with the return of an old order and genocide. James takes on the task of exterminating this cancer before it becomes too powerful to stop.

This book contains most of the papers presented at the 7th International Conference on Environmental Problems in Coastal Regions . The conference provides a forum for the discussion of problems that are related to coastal regions, which are increasingly being affected by population growth and industrial and tourism activities. The pressure of these developments generates social, ecological and economic problems, the solution of which requires an interdisciplinary approach. Effective strategies for the management of coastal areas should therefore consist of dynamic and integrated solutions in order to control their environmental quality. The contributions included in this book are listed in the following sections: Ecology and the Coastal Environment; Coastal Deterioration; Management of Risk; Water Quality Issues; Sediment Transport; Coastal Dunes
