Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

Mary doesn't know what makes her angrier - the way he doesn't quite reach the laundry basket when he throws his dirty clothes at it (but never walks over and picks them up and puts them in), or the balled-up tissues he leaves on the bedside table when he has a cold, or the way he never completely empties the dishwasher, but leaves the 'difficult' things for her to put away. Is it that because she is 'only working part-time' she is responsible for everything on the domestic front? Or is it, simply, that he puts used teabags in the sink? Mary is the mother of two young boys - she knows how you're supposed to get the behaviour you want. So now she's designing the spousal equivalent of a star chart. Every little thing her husband does wrong is going on it. And yes, she know you're supposed to reward the good behaviour rather than punish the bad, but obviously the rules for those in middle age are different than the rules for those not even in middle school...
