it is essential to test the acidity of food, especially when canning or jarring.

How to Test the Acidity of Food | LEAFtv

The traditional test for determining acid production by *Neisseria* and related species has been the Cystine Trypticase Agar (CTA) test in which a base medium was supplemented with a 1% (final concentration) filter-sterilized carbohydrate solution adjusted to a final pH of 7.3. Phenol red indicator is added to detect acid; this indicator changes from red (alkaline) to yellow (acid).
