Chapter 2 Cell Cycle Answers
cells are cells that are not gamete cells. So, 46 chromosomes are in each somatic cell and somatic cells undergo MITOSIS.

Mitosis: is the way that cells create more cells. Prior to mitosis, there is the interphase (which accounts for approx. 95% of the cell's life cycle process) phase

Chapter 12 Cell
Cycle Answers

Cell division is part of the cell cycle, the life of a cell from its

origin in the division of a parent cell until its own division into two. Concept 12.1

Cell division results in genetically identical daughter cells. Cell division requires the distribution of identical genetic material—DNA—to
