It should, however, not be used on coolant systems, oil systems or fuel-injection systems that produce pressures higher than 50 psi. SAE ratings displayed on the hose should be 30R6 or 30R7. Neoprene fuel line is available in 1/8-inch through 5/8-inch sizes on bulk rolls, with additional 3-foot sections of large 1-1/2-inch through 2-1/4-inch sizes available for gas filler neck applications.

Tech 101: Fuel-line hose - what you should and should not use

Fuel injection is the introduction of fuel in an internal combustion engine, most commonly automotive engines, by the means of an injector. This article focuses on fuel injection in reciprocating piston and rotary piston engines. All Diesel (compression-ignition) engines use fuel injection, and many Otto (spark-ignition) engines use fuel injection of one kind or another.

Fuel injection - Wikipedia

One can of this fuel injector cleaner is to be used on 20 gallons of fuel. It can be used on any vehicle with gasoline or diesel engine, 4-stroke or 2-stroke.

Top 10 Best Fuel Injector Cleaners, 2020 - AutoGuide.com

The fuel injector supplies fuel for engine. Each fuel injections system is different since it is calibrated for a specific type of fuel. A cracked fuel injector can cause a fuel leak which will cause you to pay more for gas. A faulty injector restricts the flow of fuel which in the long run could cause your engine to idle or misfire.

How to Use Fuel Injection Cleaner | DoItYourself.com
