The General Electric CF6, US military designation F103, is a family of high-bypass turbofan engines produced by GE Aviation. Based on the TF39, the first high-power high-bypass jet engine, the CF6 powers a wide variety of civilian airliners. The basic engine core also powers the LM2500, LM5000, and LM6000 marine and power generation turboshafts.

~~General Electric CF6 - Wikipedia~~

The CF6 Engine The CF6 engine family is the cornerstone of the widebody engine aircraft business. For 45 years, the CF6 engine family has established an impressive operational record. CF6 engines have compiled nearly 430 million flight hours since they first entered commercial revenue service in 1971.

~~The CF6 Engine | GE Aviation~~

The CF6 engine family has a power range of up to 313 KN (72,000 lb) of thrust, and powers other aircraft including the Boeing 747 and 767, McDonnell Douglas MD-11, and Airbus Industrie A300, A310 and A330. The artifact is displayed in a simulated engine test cell.

Meet the CF6 The CF Series pianos are characterized by a wide palette of tonal colors and the ability to create the most subtle, expressive nuances. They can "sing" phrases with a depth of expressiveness rarely heard. The 7<sup>th</sup> CF6 sounds remarkably like a full length concert grand with its rich open sound, and its action is quick and responsive.
