The Russian Revolution had a decisive impact on the history of the twentieth century. In the years following the collapse of the Soviet regime and the opening of its archives, it has become possible to step back and see the full picture. Starting with an overview of the roots of the revolution, Fitzpatrick takes the story from 1917, through Stalin's 'revolution from above', to the great purges of the 1930s. She tells a gripping story of a Marxist revolution that was intended to transform the world, visited enormous suffering on the Russian people, and, like the French Revolution before it, ended up by devouring its own children. This updated edition contains a fully revised bibliography and updated introduction to address the centenary, what does it all mean in retrospect.

Following the success of Rees' bestselling Auschwitz, this substantially revised and updated edition of The Nazis - A Warning from History tells the powerfully gripping story of the rise and fall of the Third Reich. During a 16-year period, acclaimed author and documentary-maker Laurence Rees met and interviewed a large number of former Nazis, and his unique insights into the Nazi psyche and World War 2 received enormous praise. At the heart of the book lies compelling eyewitness accounts of life under Adolf Hitler, spoken through the words of those who experienced the Nazi regime at every level of society. An extensive new section on the Nazi/Soviet war (previously published in Rees' War of the Century) provides a chilling insight into Nazi mentality during the most bloody conflict in history. Described as one of the greatest documentary series of alltimes The Nazis - A Warning from History won a host of awards, including a BAFTA and an International Documentary Award.

One of the most popular Indian novels of all ages, 'Ananda Math' was translated innumerable times into Indian and English languages. Five editions were published in Bengali and Hindi during the author's lifetime, the first in 1882. The novel has the backdrop of the 18th century famine in Bengal, infamous as "Chhiyattorer Manvantar" (famine of 76th Bengali year, 1276), to narrate the saga of armed uprising of the ascetics and their disciples against the pillaging East India Company rulers. The uprising is historically known as 'Santan Vidroha', the ascetics being the children of Goddess Jagadambe. The saga of 'Ananda Math' is thrilling and best epitomised in the patriotic mass-puller song "Bande Mataram" ('Hail thee, O My Motherland'). The song is still a mantra that stirs imagination of millions of Hindus. The ascetics robbed the tormentors of people – the British rulers and the greedy zamindars – distributed the looted wealth to poverty-stricken people but kept nothing for themselves. Their targets were mostly the Company armoury and supplies. They had a highly organised setup, spread throughout Bengal. It was also India's first battle for freedom, and not the Sipahi Vidroha of 1857.

Pastoralism has shaped livelihoods and landscapes on the African continent for millennia. Mobile livestock husbandry has generally been portrayed as an economic strategy that successfully met the challenges of low biomass productivity and environmental variability in arid and semi-arid environments. This volume focuses on the emergence, diversity, and inherent dynamics of pastoralism in Africa based on research during a twelve-year period on the southwest and northeast regions. Unraveling the complex prehistory, history, and contemporary political ecology of African pastoralism, results in insight into the ingenuity and flexibility of historical and contemporary herders.

This volume, *The New Social Studies: People, Projects and Perspectives* is not an attempt to be the comprehensive book on the era. Given the sheer number of projects that task would be impossible. However, the current lack of knowledge about the politics, people and projects of the NSS is unfortunate as it often appears that new scholars are reinventing the wheel due to their lack of knowledge about the history of the social studies field. The goal of this book then, is to sample the projects and individuals involved with the New Social Studies (NSS) in an attempt to provide an understanding of what came before and to suggest guidance to those concerned with social studies reform in the future—especially in light of the standardization of curriculum and assessment currently underway in many states. The authors who contributed to this project were recruited with several goals in mind including a broad range of ages, interests and experiences with the NSS from participants during the NSS era through new, young scholars who had never heard much about the NSS. As many of the authors remind us in their chapters, much has been written, of the failure of the NSS. However, in every chapter of this book, the authors also point out the remnants of the projects that remain.

Hurricanes are nature's most destructive storms and they are becoming more powerful as the globe warms. *Hurricane Climatology* explains how to analyze and model hurricane data to better understand and predict present and future hurricane activity. It uses the open-source and now widely used R software for statistical computing to create a tutorial-style manual for independent study, review, and reference. The text is written around the code that when copied will reproduce the graphs, tables, and maps. The approach is different from other books that use R. It focuses on a single topic and explains how to make use of R to better understand the topic. The book is organized into two parts, the first of which provides material on software, statistics, and data. The second part presents methods and models used in hurricane climate research.
