Dave Ramsey teaches you how to make the right moves with your money.

What Are You Waiting For? This book will change the way you think about investing-and the results will prove it! "This is the simple hands-on, how-to and why book many readers have been looking for." -Scott Burns, syndicated columnist Daniel Solin cuts through the financial hype to show you exactly how to invest-with an easy-to-follow four-step plan that lets you create and monitor your investment portfolio in ninety minutes or less...and put your investment earnings in the top 5 percent of all professionally managed money. If you want to gamble, go to Las Vegas-or try stock picking and market timing. If you want to be a Smart Investor, follow this effortless and effective plan. "The Smartest Investment Book You'll Ever Read will provide the enlightenment and gumption to get yourself back on track." -William Bernstein, author of *A Splendid Exchange* and *The Four Pillars of Investing* Every day you wait costs you money. Take control of your financial future now!

A Best Book of the Year: The Financial Times, Bloomberg, Chicago Tribune, and Detroit Free Pres Malcolm Gladwell, host of the podcast Revisionist History and author of the #1 New York Times bestseller *Outliers*, offers a powerful examination of our interactions with strangers -- and why they often go wrong. How did Fidel Castro fool the CIA for a generation? Why did Neville Chamberlain think he could trust Adolf Hitler? Why are campus sexual assaults on the rise? Do television sitcoms teach us something about the way we relate to each other that isn't true? While tackling these questions, Malcolm Gladwell was not solely writing a book for the page. He was also producing for the ear. In the audiobook version of *Talking to Strangers*, you'll hear the voices of people he interviewed--scientists, criminologists, military psychologists. Court transcripts are brought to life with re-enactments. You actually hear the contentious arrest of Sandra Bland by the side of the road in Texas. As Gladwell revisits the deceptions of Bernie Madoff, the trial of Amanda Knox, and the suicide of Sylvia Plath, you hear directly from many of the players in these real-life tragedies. There's even a theme song - Janelle Monae's "Hell You Talmbout." Something is very wrong, Gladwell argues, with the tools and strategies we use to make sense of people we don't know. And because we don't know how to talk to strangers, we are inviting conflict and misunderstanding in ways that have a profound effect on our lives and our world.

Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

For Computer Systems, Computer Organization and Architecture courses in CS, EE, and ECE departments. Few students studying computer science or computer engineering will ever have the opportunity to build a computer system. On the other hand, most students will be required to use and program computers on a near daily basis. Computer Systems: A Programmer's Perspective introduces the important and enduring concepts that underlie computer systems by showing how these ideas affect the correctness, performance, and utility of application programs. The text's hands-on approach (including a comprehensive set of labs) helps students understand the under-the-hood operation of a modern computer system and prepares them for future courses in systems topics such as compilers, computer architecture, operating systems, and networking.

Second Language Learning and Language Teaching provides an introduction to the application of second language acquisition research to language teaching. Assuming no previous background in second language acquisition or language teaching methods, this text starts by introducing readers to the basic issues of second language acquisition research. It then examines how people learn particular aspects of the second language, such as grammar, vocabulary, pronunciation and the writing system, and at the strategies they adopt in their learning and the differences between individuals. Final chapters look at second language learning in a broader context -- the goals of language teaching and how teaching methods relate to SLA research. This newly updated fifth edition builds on the comprehensive scope of earlier editions while also addressing more recent developments in the field, particularly multilingual approaches to language teaching.

Contains over two hundred lesson plans that introduce students to new vocabulary words, each with a list of words with pronunciation keys, a paragraph that uses the words in context, sample sentences, definitions, and a daily idiom.

Beginning with the achievements of Mahatma Gandhi, and following the legacy of nonviolence through the struggles against Nazism in Europe, racism in America, oppression in China and Latin America, and ethnic conflicts in Africa and Bosnia, Michael Nagler unveils a hidden history. Nonviolence, he proposes, has proven its power against arms and social injustice wherever it has been correctly understood and applied. Nagler's approach is not only historical but also spiritual, drawing on the experience of Gandhi and other activists and teachers. Individual chapters include *A Way Out of Hell*, *The Sweet Sound of Order*, and *A Clear Picture of Peace*. The last chapter includes a five-point blueprint for change and "study circle" guide. The foreword by Arun Gandhi, the grandson of Mahatma Gandhi, is new to this edition.

Includes corrected 1818 text of the novel and seven essays about the novel.

This publication joins two cryptologic history monographs that were published separately in 1989. In part I, the author identifies and presents a thorough account of German intelligence organizations engaged in clandestine work in South America as well as a detailed report of the U.S. response to the perceived threat. Part II deals with the cryptographic systems used by the various German intelligence organizations engaged in clandestine activities.
