Andrew McAfee, principal research scientist at MIT and coauthor of The Second Machine Age "Garry Kasparov has been a true pioneer in both the theory and practice of human-machine intelligence. Deep Thinking encompasses his wisdom in these areas in a highly entertaining and informative manner. I couldn't put it down, and don't think you will be able to either."

Deep Thinking: Where Machine Intelligence Ends and Human ...

Deep Thinking is Kasparov's story of his match against Deep Blue and the evolution of playing against chess programs. The book tries to touch on the penetration of AI in society today and the author brings his perspective on the benefits of technology to today's world. This book is largely about the author's experience of the improvements in chess programming, how he faced it psychologically and how he prepared for games in this new era.
