### Emd 710 Diesel Engine

The EMD 710 is a line of diesel engines built by Electro-Motive Diesel (previously General Motors ' Electro-Motive Division). The 710 series replaced the earlier EMD 645 series when the 645F series proved to be unreliable in the early 1980s 50-series locomotives which featured a maximum engine speed of 950 rpm.

---

### EMD 710 - Wikipedia

The EMD model 710 prime mover is the builder's latest diesel engine powering its locomotives. It has been in production since 1984.

...

The General Motors EMD engine line is typical of the two-stroke diesel breed. These engines were introduced in the 1930s and power a large number of the diesel locomotives found in the United States. There have been three successive series in the EMD line: the 567 series, the 645 series, and the 710 series. The numbers refer to the number of cubic inches per cylinder, with a typical engine having 16 cylinders (for a total displacement on the order of 10,000 cubic inches!).
