A multi-faceted commentary that breathes fresh insight into Paul's letter In Second Corinthians, Paul responds to reports of the Corinthian congregation questioning his competency as a divinely sent messenger. Through apologetic demogoria and the use of graphic imagery related to triumphal processions, siege warfare, and emissary travels and negotiation, Paul defends his constancy, persona, and speaking abilities as he extends the offer of clemency and reconciliation to his auditors. Oropeza combines rhetorical pictures (rhetography) with interpretative layers (literary features, intertextuality, socio-cultural, ideological, and sacred textures) to arrive at the rhetorical impact of Paul's message for ancient Mediterranean discourse. Features: A visual, sensory, and imaginative interpretation of the scripture A comprehensive commentary An avant-garde approach to biblical interpretation

The present volume is the second publication generated by the Project "Text, Action and Space". The first volume, Exploring Textual Action (Aarhus University Press, Acta Jutlandica, Humanistic Series, 2010), focused on textual action and performativity and their spatial implications. This volume aspires to contribute to the investigation of emotions and their interaction with the dynamics of textuality and spatiality, showing the essential role of literature and the arts in the understanding of affective phenomena, such as emotions, feelings, sentiments, dispositions and moods. All the articles are explorative in the sense that they work with concrete texts and other art works. As in the first volume, those with greater emphasis on the conceptual aspects are united in the section "Elaborations", while the contributions with a stronger analytical perspective can be found under the heading "Explorations".

The classic book on color photography is back in print and completely revamped for a digital photography audience! Learn from step-by-step instruction, illustrative charts, and unbelievably inspirational imagery in this guide meant just for color photographers. World renowned artists give you insight as to "how they did that" and the author provides challenging assignments to help you take photography to a new level. With aesthetic and technical instruction like no other, this book truly is the bible for color photographers. Be sure to visit the companion website, featuring portfolios and commentary by contemporary artists: www.exploringcolorphotography.com

Jake Green is dead. Or he might as well be when he mistakenly accepts a package from the Embassy of the Dead in this hilarious adventure of the afterlife, the first in a series. When Jake Green opens a mysterious box containing a severed finger, he accidentally summons a grim reaper intent on dragging him to the Eternal Void (yes, it's as fatal as it sounds). Now Jake is running for his life. Luckily, he has a knack for talking to ghosts, which just might help him survive long enough to reach the Embassy of the Dead and plead his case. With the help of a prankster poltergeist and a dead undertaker, Jake dodges fearsome undead creatures, discovers his own ghostly abilities, and gets excused from the school field trip due to a terrible (and made-up) bout of diarrhea. But the Embassy has its own problems, and Jake must be very careful where he places his trust—in both the living and the dead. With a plot that zips and a colorful cast of characters, this delightful new series delivers laughs and shivers in equal measure.

Presents thousands of alphabetized entries on topics and terms related to the Bible and its study, providing biblical references and cross-references, and includes hundreds of drawings, photos, and maps. This volume covers A-D.

The United States Exploring Expedition was the first American scientific expedition of any size, charged to "extend the bounds of Science and promote the acquisition of knowledge," and was one of the most ambitious Pacific expeditions ever attempted' (Forbes). The expedition represents 'the first governmental sponsorship of scientific endeavor and was instrumental in the nation's westward expansion. Specimens gathered by expedition scientists became the foundation collections of the Smithsonian Institution. Significant American contributions in the fields of geology, botany, conchology, anthropology, and linguistics came from the scientific work of the expedition. Wilkes's evaluations of his landfalls influenced later U.S. positions in those areas' (Dictionary of American Biography). 'The chief fields of exploration in this expedition were the coast of the Antarctic continent, the islands of the Pacific Ocean, and the American northwest coast. In total some 280 islands in the Pacific and adjacent waters and 800 miles of streams and coasts in the Oregon country were surveyed, and 1,600 miles of the the coast of Antarctica were charted. After leaving Hampton Roads in 1838, the expedition visited Madeira, the Cape Verde Islands, Brazil, Patagonia, the South Shetland Islands, Peter Island, Chile, and Peru, before proceeding to the Tuamotu or the low Archipelago, the Samoa Islands, and New South Wales. From Sydney, Wilkes sailed into the region now known as Wilkesland in Antarctica. He visited New Zealand, Tonga, the Fiji group, and the Hawaiian Islands in 1840, and in 1841 explored the west coast of North America. Much valuable information is given on the Columbia River, the Willamette Valley, Puget Sound, the Strait of Juan de Fuca, and the Sacramento Valley, and the findings on the northwest coast of America proved timely in light of the dispute with Great Britain over the Oregon Territory. The Wilkes expedition also visited San Francisco bay and the Sacramento River. Crossing the Pacific, Wilkes called at the Philippine Islands, the Sulu Archipelago, Borneo, Singapore, and, rounding the Cape of Good Hope, finally reached New York in 1842, having sailed round the world'
