Since the relay coil may produce unwanted voltage spikes into the circuit wiring (which may damage the electronics in some fan units), some effort has been made to suppress these. In this case, a common 0.1uF/100 Ohm RC mains input suppressor, as well as a 250VAC Metal Oxide Varistor (MOV) transient suppressor were used in parallel.

Mount the fan as high up on the core as possible. Attach the fan to the small area around the core Of the radiator where there is a metal lip that is approximately 1/4" to 3/8". This will allow mounting of the fan(s) without compromising the core of the radiator. (Please call for fan shroud suggestions). Wiring: Mount the relay in a secure place in the engine compartment away from heat sources.
