Dublin, June 03, 2021 (GLOBE NEWSWIRE) -- The "Push Lawn Mowers Global Market Report 2021: COVID-19 Impact and Recovery to 2030" report has been added to ResearchAndMarkets.com's offering.

The essays in this book examine various forms of popular culture and the ways in which they represent, shape, and are constrained by notions about and issues within higher education. From an exploration of rap music to an analysis of how the academy presents and markets itself on the World Wide Web, the essays focus attention on higher education issues that are bound up in the workings and effects of popular culture.

Providing a comprehensive approach to both the art and science of reliability engineering, this volume covers all aspects of the field, from basic concepts to accelerated testing, including SPC, designed experiments, human factors, and reliability management. It also presents the theory of reliability systems and its application as prescribed by industrial and government standards.

Based on a 15-year successful approach to teaching aircraft flight mechanics at the US Air Force Academy, this text explains the concepts and derivations of equations for aircraft flight mechanics. It covers aircraft performance, static stability, aircraft dynamics stability and feedback control.

There have always been homeless people in the United States, but their plight has only recently stirred widespread public reaction and concern. Part of this new recognition stems from the problem's prevalence: the number of homeless individuals, while hard to pin down exactly, is rising. In light of this, Congress asked the Institute of Medicine to find out whether existing health care programs were ignoring the homeless or delivering care to them inefficiently. This book is the report prepared by a committee of experts who examined these problems through visits to city slums and impoverished rural areas, and through an analysis of papers written by leading scholars in the field.

Market_Desc: · Statisticians · Engineers · Computer Scientists · Senior/Graduate Level Students · Professors of Stochastics Processes Special Features: · Focuses on the application of stochastic process with emphasis on queuing networks and reversibility. · Describes processes from a probabilistic instead of an analytical point of view. About The Book: The book provides a non measure theoretic introduction to stochastic processes, probabilistic intuition and insight in thinking about problems. This revised edition contains additional material on compound Poisson random variables including an identity which can be used to efficiently compute moments, Poisson approximations; and coverage of the mean time spent in transient states as well as examples relating to the Gibb's sampler, the Metropolis algorithm and mean cover time in star graphs.

New York Times bestselling author Patti Callahan Henry delivers a novel that explores the power of lasting love through the connected stories of two women from opposite sides of the sea. Twenty-seven-year-old Kara Larson is bogged down in the stress of planning her elaborate wedding to a professional golfer. Still, to fulfill the requirements of the Palmetto Pointe Junior Society, she makes time in her busy schedule to visit an elderly woman at a nursing home facility. Soon she finds herself mesmerized by the singsong Irish lilt of ninety-six-year-old Maeve Mahoney as Maeve recounts the rambling story of her first love back in Ireland. Or, Kara begins to wonder, is she really retelling an ancient tale of myth and legend? Waiting for the story to unfold in bits and pieces, and trying to discern the underlying truth, Kara is drawn in—and driven to remember her own first love: childhood neighbor Jack Sullivan. Gradually she realizes that before she embarks on her new life, she must find out how her own story—with Jack—will end. " About all the things that make us worthy as human beings—integrity, honesty, and living the life you are meant to live....A triumph! " —Dorothea Benton Frank " A passionate, unforgettable novel of self-discovery, regret, and the illuminating power of love. " —Mary Alice Monroe

Haynes offers the best coverage for cars, trucks, vans, SUVs and motorcycles on the market today. Each manual contains easy to follow step-by-step instructions linked to hundreds of photographs and illustrations. Included in every manual: troubleshooting section to help identify specific problems; tips that give valuable short cuts to make the job easier and eliminate the need for special tools; notes, cautions and warnings for the home mechanic; color spark plug diagnosis and an easy to use index.

Whether you're involved in a highly specialized operation, or need comprehensive information on many types of die designs, this book is your best bet book on how to design dies. Hundreds of illustrations on proven designs are included, as well as hundreds of tables and equations to help you make quick calculations for allowances, pressures, forces and more.
