Gives students of automotive engineering a basic understanding of the principles involved with designing a vehicle and includes details of engines and transmissions, vehicle aerodynamics and computer modelling.

This superbly illustrated book provides information of outstanding quality on the presentation and management of the entire range of sports injuries and conditions likely to be encountered by the sports medicine physician, as well as many other topics relating to sports activity, events, and outcomes. It is the product of close collaboration among members of several ISAKOS committees, and the chapter authors are clinicians and scientists from across the world who are acknowledged experts in sports medicine and orthopedics. The book opens by discussing fundamental topics and principles, covering subjects such as the biomechanics of injuries, physiological demands in sports practice, sports activity at different ages, nutrition and hydration, strength and conditioning, injury prevention, recovery, rehabilitation, and return to play. Subsequent chapters focus in depth on overtraining injuries, neurological disorders, sports trauma to different parts of the body, and special clinical conditions. Further topics to be addressed are different scenarios in sports (e.g., indoor vs outdoor), sports equipment, biologic treatment of sports injuries, major sporting events, and patient-recorded outcome measures.

Bantam 1988'A financial thriller right out of the headlines.' Adam SmithA high-finance, high-tech thriller of Wall Street, murder, currency manipulation. A mysterious Japanese industrialist begins a massive 'hedging' in the US markets. Two weeks later, in Japan's Inland Sea, divers working for him recover the Imperial Sword, given to Japan's first Emperor by the Sun Goddess. Can a lone

This brief text is designed to help both beginning and advanced students of photography better develop and articulate thoughtful criticism. Organized around the major activities of criticism (describing, interpreting, evaluating, and theorizing), Criticizing Photographs provides a clear framework and vocabulary for students' critical skill development.

If Chins Could Kill: Confessions of a B Movie Actor Here we are together in the digital universe. Somehow, you've clicked yourself to this page. If you came here of your own free will and desire, you and I are going to get along just fine. Life is full of choices. Right now, yours is whether or not to download the autobiography of a mid-grade, kind of hammy actor. Am I supposed to know this guy? you think to yourself. No-and that's exactly the point. You can download a terabyte of books about famous actors and their high-falootin' shenanigans. I don't want to be a spoilsport, but we've all been down that road before. Scroll down to that Judy Garland biography. You know plenty about her already-great voice, troubled life. Scroll down a little further to the Charlton Heston book. Same deal. You know his story too-great voice, troubled toupee. The truth is that though you might not have a clue who I am-unless you watch cable very late at night-there are countless working stiff's like me out there, grinding away every day at the wheel of fortune. If Chins Could Kill: Confessions of a B Movie Actor documents my time in blue-collar Hollywood, where movies are cheap, the hours are long, and the filmmaking process can be very personal. To keep up with the times, I've digitized Chins. It was originally published in hardcover/analog fifteen years ago, which is a vast amount of time in the evolution of books and technology, and it was time to get current. The advance of technology is great for a book like this, which is jammed full of pictures. When it came out originally, the photographs all had to be black and white and moderately sized on the page. Now, any photo that was originally taken in color can strut its stuff. Overall, the resolution of the images is off-the-charts better than the first go-around. This is one "sequel" that I'm happy to be a part of, since we could make so many technical improvements. The process was very similar to restoring an old movie. Since I knew that it was going to be reissued, I also had a look at the story being told and decided to condense, move, or clarify some chapters, all or in part. I also tried to add a hint of historical context, since it has been a decade and a half since Chins first came out. I hope you enjoy it. Regards, Bruce Campbell

Designed for teaching astrophysics to physics students at advanced undergraduate or beginning graduate level, this textbook also provides an overview of astrophysics for astrophysics graduate students, before they delve into more specialized volumes. Assuming background knowledge at the level of a physics major, the textbook develops astrophysics from the basics without requiring any previous study in astronomy or astrophysics. Physical concepts, mathematical derivations and observational data are combined in a balanced way to provide a unified treatment. Topics such as general relativity and plasma physics, which are not usually covered in physics courses but used extensively in astrophysics, are developed from first principles. While the emphasis is on developing the fundamentals thoroughly, recent important discoveries are highlighted at every stage.

Documents the life story of the star of the documentary "Murderball," recounting the accident that rendered him a quadriplegic, his Olympic achievements, and his defiant determination to enjoy a regular life.

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.
