Corporation : the Cost of Capital ...

Marriott cost of capital
Objective: 1) Calculate
the divisional and the
company cost of capital
and explain the
calculation. 2) Evaluate
Marriott's use of
company cost-of-capital
rate for the individual
divisions. Cost of
Capital for Lodging
Division can be

Online Library Marriott

expressed as $CC = W_e * C_e + W_d * C_d$. For the weights of debt and equity (W_e and W_d), the 1988 target-schedule rates of debt-to-assets and debt-to-equity were used as the only measures available in the case.

Essay about Marriott Corporation: the Cost of Capital ...

Online Library

Marriott

Marriott was to use a single corporate hurdle rate then they will be using the 11.39% rate which is for the entire company. By Marriott using this rate, then any project that arises out of the lodging division will be rejected since its cost of capital of 9.25% is lower than the cost of capital for the company.

Marriott Corporation - Cost of Capital Case Study Solution

For Marriott, the cost of capital is the total of the management fee and operating fee. The three main operating costs are the cost of construction, investment and

Online Library Marriott

depreciation. After the five years of occupancy, these fees are offset by the income from the rent, plus a profit for the loss component, and some other expenses are included.
