3 Simple Steps for Solving Mixture Problems

Mixture word problems involve creating a mixture from two ingredients. A common type of problem is creating a solution of a certain strength, such as a 20% saline solution, from two solutions of varying strengths.

Where To Download

Since these are multi-step problems involving a bit of logic, they can sometimes be confusing to solve.

How to Solve Mixture Word Problems (with Pictures) - wikiHow

Mixture problems are ones where two different solutions are mixed together

Where To Download

resulting in a new final solution. We will use the following table to help us solve mixture problems:

Amount	Part	Total	Item1	Item2
Final	The first column	is for the amount of	each item we have.	The second column is
	labeled "part".
