The rise of China has reconstituted the regional identity in Asia as well as the lens through which understanding of China and self-understanding are no longer separate processes intellectually. China scholarship in South and Southeast Asia necessarily highlights meanings of encountering China that Western social sciences fail to reflect because academics in many places, being migrants, navigate and combine more than one civilization forces. With China in itself undergoing transformation, it is unlikely that one can simply speak of China without multiple qualifications of what one actually refers to.

The book gathers authors who come from different scholarly traditions to reflect upon how the presentation of China in academic writings as well as think tank analyses can engender different identity possibilities. The book therefore complicates the category 'China' to enable mutual empathy between everything that in one way or another relies on Chineseness as object or subject in accordance with the identity strategies of the China experts.

This edited book explores critical issues relating to Content and Language Integrated Learning (CLIL) and English as a Medium of Instruction (EMI), setting out their similarities and differences to demystify the terms and their implications for classroom practice. The authors show how CLIL and EMI practices are carried out in different institutional contexts and demonstrate how both approaches can benefit language and content acquisition. This book is addressed to second/foreign language teaching staff involved in teaching in English at primary education, secondary education, and higher education levels.

Competition Science Vision (monthly magazine) is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India. Through a multi-sited qualitative study of three Kenyan secondary schools in rural Taita Hills and urban Nairobi, the volume explores the ways the dichotomy between "Western" and "indigenous" knowledge operates in Kenyan education. In particular, it examines views on natural sciences expressed by the students, teachers, the state's

Get Free Natural Science Grade 9 Exam Papers 2010

curricula documents, and schools' exam-oriented pedagogical approaches. O'Hern and Nozaki question state and local education policies and practices as they relate to natural science subjects such as agriculture, biology, and geography and their dismissal of indigenous knowledge about environment, nature, and sustainable development. They suggest the need to develop critical postcolonial curriculum policies and practices of science education to overcome knowledge-oriented binaries, emphasize sustainable development, and address the problems of inequality, the center and periphery divide, and social, cultural, and environmental injustices in Kenya and, by implication, elsewhere. "In an era of environmental crisis and devastation, education that supports sustainability and survival of our planet is needed. Within a broader sociopolitical context of post-colonialism and globalization, this volume points out possibilities and challenges to achieve such an education. The authors propose a critical, postcolonial approach that acknowledges the contextual and situational production of all knowledge, and that de-dichotomizes indigenous from 'Western' scientific knowledge." Eric (Rico) Gutstein, Professor, Curriculum and Instruction, University of Illinois at Chicago (USA)
