of Ayurvedic Home Remedies offers natural alternatives to conventional medicines and treatments with practical advice and easy-to-follow instructions. Dr. Vasant Lad, a leading authority in this field, has created an invaluable guide to treating common ailments and chronic problems with strategies tailored to your personal needs based on your dosha. Dr. Lad first explains the principles behind the science of Ayurveda, exploring the physical and psychological characteristics of each of the three doshas, or mind-body types--vata, pitta, and kapha. Once you have determined which type or combination of types you are, Dr. Lad helps you to begin your journey to the ultimate "state of balance" and well-being. Dr. Lad explains why certain imbalances often result in illness and shows you how to restore your body to natural order. You'll learn which traditional Ayurvedic remedies--herbal teas and formulas, essential oils, meditation, yoga--offer relief from a variety of conditions, such as cold and flu symptoms, headaches, toothaches, sore throats, high cholesterol, vision problems, anxiety, and depression. Dr. Lad also shows you how to use diet and specific Ayurvedic techniques to prevent future illness and to promote body consciousness and healthy living. The Complete Book of Ayurvedic Home Remedies enables us all to experience the benefits of Ayurveda's healing properties that have been refined over thousands of years. All of the herbs, foods, and oils Dr. Lad recommends can be found in local health food stores or through mail-order catalogs. Complete with an extensive glossary and resource list, this is the definitive guide to natural, safe, and effective remedies, everyday keys to a lifetime of vitality and well-being.

DIY Detox Kidneys filter the blood to keep you healthy. With this book you can keep your kidneys healthy. The Miracle Kidney Cleanse shows how to flush out toxins and maximize the benefits of the body's natural cleansing system, including:

- Preventing painful kidney stones
- Boosting immune function
- Increasing energy
- Helping ensure fertility
- Improving mood
- Curing low-back kidney pain

The Miracle Kidney Cleanse is the safest and gentlest way to dissolve kidney-congesting salts, minerals, uric acid and proteins. This straightforward plan also details the daily supplements and foods to eat, as well as the foods to avoid, to keep the kidneys functioning smoothly.

This book by the National Institutes of Health (Publication 06-4082) and the National Heart, Lung, and Blood Institute provides information and effective ways to work with your diet because what you choose to eat affects your chances of developing high blood pressure, or hypertension (the medical term). Recent studies show that blood pressure can be lowered by following the Dietary Approaches to Stop Hypertension (DASH) eating plan--and by eating less salt, also called sodium. While each step alone lowers blood pressure, the combination of the eating plan and a reduced sodium intake gives the biggest benefit and may help prevent the development of high blood pressure. This book, based on the DASH

research findings, tells how to follow the DASH eating plan and reduce the amount of sodium you consume. It offers tips on how to start and stay on the eating plan, as well as a week of menus and some recipes. The menus and recipes are given for two levels of daily sodium consumption-2,300 and 1,500 milligrams per day. Twenty-three hundred milligrams is the highest level considered acceptable by the National High Blood Pressure Education Program. It is also the highest amount recommended for healthy Americans by the 2005 "U.S. Dietary Guidelines for Americans." The 1,500 milligram level can lower blood pressure further and more recently is the amount recommended by the Institute of Medicine as an adequate intake level and one that most people should try to achieve. The lower your salt intake is, the lower your blood pressure. Studies have found that the DASH menus containing 2,300 milligrams of sodium can lower blood pressure and that an even lower level of sodium, 1,500 milligrams, can further reduce blood pressure. All the menus are lower in sodium than what adults in the United States currently eat-about 4,200 milligrams per day in men and 3,300 milligrams per day in women. Those with high blood pressure and prehypertension may benefit especially from following the DASH eating plan and reducing their sodium intake.

Kidney stone is a significant disease with a 12-15% prevalence in the United States. Patients with a history of stones have a 50% risk of making another stone in 5 years or 80% risk in their lifetime. The goal of this book is to educate the reader on the nuts and bolts of stone disease and to provide new and updated information to help them tackle this painful disease.
