Rethinking the SAT is a unique presentation of the latest thoughts and research findings of key individuals in the world of college admissions, including the president of the largest public university system in the U.S., as well as the presidents of the two companies that sponsor college admissions tests in the U.S. The contributors address not only the pros and cons of the SAT itself, but the broader question of who should go to college in the twenty-first century.

*Using real data, the authors show you how statistical techniques are used with increasing frequency in a variety of fields, including business, medicine, social sciences, and applied sciences such as engineering. Their accessible writing style is enhanced by numerous examples, including hands-on activities and "Seeing Statistics" applets."--Publisher description.

Encompassing profiles of every four-year college in the United States, an updated guide provides detailed information on academic programs, admissions requirements, financial aid, services, housing, athletics, contact names, and more for 1,600 four-year colleges throughout the U.S. Original. 22,000 first printing.

Profiles more than 3,200 degree programs for traditional students, RNs, advanced-practice nurses, and nurse Ph.D.s, and includes research-facility descriptions, tuition, financial aid programs, and entrance requirements.

Provides information on the ACRL standards and information literary assessments.

This engaging book presents the essential mathematics needed to describe, simulate, and render a 3D world. Reflecting both academic and in-the-trenches practical experience, the authors teach you how to describe objects and their positions, orientations, and trajectories in 3D using mathematics. The text provides an introduction to mathematics for game designers, including the fundamentals of coordinate spaces, vectors, and matrices. It also covers orientation in three dimensions, calculus and dynamics, graphics, and parametric curves.

This book takes a fresh look at programs for advanced studies for high school students in the United States, with a particular focus on the Advanced Placement and the International Baccalaureate programs, and asks how advanced studies can be significantly improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs.
