Designated a Doody's Core Title! "This is a valuable resource for readers seeking basic to advanced information on measurement. It should be on the bookshelf of all researchers, and a requirement for graduate nursing students."Score: 100, 5 stars--Doody's Medical Reviews "...this book is a wonderful shelf reference for nurse researcher mentors and investigators who may need to explore content or use content to design, test, select, and evaluate instruments and methods used in measuring nurse concepts and outcomes."--Clinical Nurse Specialist This fourth edition presents everything nurses and health researchers need to know about designing, testing, selecting, and evaluating instruments and methods for measuring in nursing. Thoroughly updated, this fourth edition now contains only the latest, most cutting-edge measurement instruments that have direct applicability for nurses and health researchers in a variety of roles, including students, clinicians, educators, researchers, administrators, and consultants. Using clear and accessible language, the authors explain in detail, and illustrate by example, how to conduct sound measurement practices that have been adequately tested for reliability and validity. This edition is enriched with topics on the leading edge of nursing and health care research, such as measurement in the digital world, biomedical instrumentation, new clinical data collection methods, and methods for measuring quality of care. Key features: Provides new and emerging strategies for testing the validity of specific measures Discusses computer-based testing: the use of Internet research and data collection Investigates methods for measuring physiological variables using biomedical instrumentation Includes information on measurement practices in clinical research, focusing on clinical data collection methods, such as clinimetrics Identifies the challenges of measuring quality of care and how to address them

The ability to communicate in writing is an essential skill, particularly for nurses at the graduate level. This is a bestselling, comprehensive, and widely used resource on writing for nurse clinicians, graduate students, researchers, and faculty. It covers all types of writing that beginning and experienced nurse-authors may be required or choose to do: E-B research papers, journal articles, book chapters, clinical project findings and innovations, and preparing manuscripts for courses and all types of publication, including open access journals. Brimming with helpful examples, the book takes the reader step-by-step through the entire process of writing, from the generation of an idea through searching the nursing literature, preparing an outline, writing and revising a draft, and onward toward disseminating the finished product. This third edition includes an entirely new chapter on writing articles regarding quality improvement studies, and new information about writing for open access publications. It is also replete with practical examples of the type of writing required for successful DNP capstone projects.
