This indispensable sales tool shows you the ropes of lead qualification, the RFP process, and needs analysis and discovery, and explains how your technical know-how can add invaluable leverage to sales efforts at every step. You learn how to plan and present the perfect pitch, demonstrate products effectively, build customer relationship skills, handle objections and competitors, negotiate prices and contracts, close the sale, and so much more - including how to avoid the critical selling mistakes so often made by technical pros who jump to sales. The book also addresses key career management and team-building topics, and includes detailed case studies, concise chapter summaries, and handy checklists of skill-building tips that reinforce all the career-boosting skills and techniques you learn.

This book gives an inside view of real engineers communicating in a modern aerospace engineering environment. Using many authentic texts and language examples, the author describes the writing of specifications and requirements, engineering proposals, executive summaries and other communication tasks.

Every high-tech sales team today has technical pros on board to " explain how things work, " and this success-tested training resource is written just for them. This newly revised and expanded third edition of an Artech House bestseller offers invaluable insights and tips for every stage of the selling process. This third edition features a wealth of new material, including new chapters on business-driven discovery, white boarding, trusted advisors, and calculating ROI. This invaluable book equips new sales engineers with powerful sales and presentation techniques that capitalize on their technical background—all spelled out step-by-step by a pair of technical sales experts with decades of eye-popping, industry-giant success under their belt.
