reasonable doubt? Even sophisticated legal

“reasonable doubt.” It was not originally a legal rule at all, he shows, but a theological one. The rule as we understand it today is intended to protect the accused. But Whitman traces its history back through centuries of Christian theology and common-law history to reveal that the original concern was to protect the souls of

jurors. In Christian tradition, a person who experienced doubt yet convicted an innocent defendant was guilty of a mortal sin. Jurors fearful for their own souls were reassured that they were safe, as long as their doubts were not “reasonable.” Today, the old rule of reasonable doubt survives, but it has been turned to different purposes. The creation of the Pentagon in seventeen whirlwind months during World War II is one of the great construction feats in American history, involving a tremendous mobilization of manpower, resources, and

minds. In astonishingly short order, Brigadier General Brehon B. Somervell conceived and built an institution that ranks with the White House, the Vatican, and a handful of other structures as symbols recognized around the world. Now veteran military reporter Steve Vogel reveals for the first time the remarkable story of the

Pentagon 's construction, from it ' s dramatic birth to its rebuilding after the September 11 attack. At the center of the story is the tempestuous but courtly Somervell – “ dynamite in a Tiffany box, ” as he was once described. In July 1941, the Army construction chief sprang the idea of building a single, huge headquarters that

could house the entire War Department, then scattered in seventeen buildings around Washington. Somervell ordered drawings produced in one weekend and, despite a firestorm of opposition, broke ground two months later, vowing that the building would be finished in little more than a year. Thousands of workers descended on the

site, a raffish Virginia neighborhood known as Hell ' s Bottom, while an army of draftsmen churned out designs barely one step ahead of their execution. Seven months later the first Pentagon employees skirted seas of mud to move into the building and went to work even as construction roared around them. The colossal Army
