Select Natural selection. Click Play, and then click Pause when the Average fitness first exceeds 90%. Record the number of generations in the table below, and then repeat for a total of five trials. Calculate: Add up the number of generations and divide by five to find the mean number of generations required to reach at least 90% fitness. Fill in the last column of the table.

~~Student Exploration: Evolution: Natural and Artificial ...~~

Natural selection The process by which favorable inherited traits become more common over time. Darwin proposed that ----- was the primary mechanism of biological evolution. ----- assumes the following: more organisms are born than can survive and reproduce. Organisms compete for limited recorded and survival.

Select **Natural selection**. Click **Play**, and then click **Pause** when the **Average fitness** first exceeds **90%**. Record the number of generations in the table below, and then repeat for a total of five trials.

Trial	1	2	3	4	5	Mean Number of generations to achieve 90% fitness
-------	---	---	---	---	---	---------------------------------------------------

~~Evolution: Natural and Artificial Selection~~

As they capture the moths most easily visible against the tree surface, the moth populations change, illustrating the effects of natural selection. As an extension to the lesson, have students read the recent research that suggests natural selection is having an effect on insect populations again, but this time due to climate change. Scientists looked at changes in insect distributions over an 18-year period in Europe.
