This book contains a collection of twenty-one essays in honour of Professor Franco Montanari by eminent specialists on Homer, ancient Homeric scholarship, and the reception of the Homeric Epics in both ancient and modern times. It covers a wide range of important subjects, including neanalysis and oral poetry, the Doloneia, the Homeric scholia, the theoretical premises of Aristarchean scholarship, and Homer in Sappho, Pindar, Comedy, Plato, and Hellenistic Poetry. As a whole, the contributions demonstrate the vitality of modern scholarship on Homeric poetry.

Lists and catalogues have been en vogue in philosophy, cultural, media and literary studies for more than a decade. These explorations of enumerative modes, however, have not yet had the impact on classical scholarship that they deserve. While they routinely take (a limited set of) ancient models as their starting point, there is no comparably comprehensive study that focuses on antiquity; conversely, studies on lists and catalogues in Classics remain largely limited to individual texts, and - with some notable exceptions - offer little in terms of explicit theorising. The present volume is an attempt to close this gap and foster the dialogue between the recent theoretical re-appraisal of enumerative modes and scholarship on ancient cultures. The 16 contributions to the volume juxtapose literary forms of enumeration with an abundance of ancient non-, sub- or para-literary practices of listing and cataloguing. In their different approaches to this vast and heterogenous corpus, they offer a sense of the hermeneutic, epistemic and methodological challenges with which the study of enumeration is faced, and elucidate how pragmatics, materiality, performativity and aesthetics are mediated in lists and catalogues.

Adolescent endometriosis is a previously overlooked disease in children, the true prevalence of which is still unknown but has been estimated between 19-73%. There are numerous initial challenges faced by adolescents suffering from delayed or undiagnosed endometriosis apart from experiencing chronic pain, such as: school/work absenteeism, false diagnoses/treatments, erroneous physician referrals, unnecessary radiological studies, radiation exposure, and emergency room visits as well as early exposure to narcotic pain medications and subsequent drug tolerance, resistance or even addiction. This text presents a clear history of physician and patient understanding and awareness of endometriosis in adolescents. It lays the groundwork for this condition with background information on endometriosis in general followed by a more focused look at endometriosis in adolescents. Leading experts in the field provide chapters on the different locations where endometriotic lesions can present in adolescents as well as identified risk factors and concomitant diseases of which it is important to be aware. In addition to the clinical presentation, this book also provides information on breaking down existing barriers, such as stigma, and current activism and awareness of this condition. Adolescent Endometriosis is a first-of-its-kind text that focuses exclusively on endometriosis in the adolescent population. Written by experts in the field, this book is a comprehensive resource for clinicians in all medical disciplines that treat adolescent age girls.

Despite the relevance of Eustathios to both Classical and Byzantine studies, no monograph and no collective volume in English has yet been devoted to his figure. This book attempts to fill in this gap by addressing the various facets of his output - above all his commentaries on Homer, Dionysius the Periegete, Pindar, and the Iambic Canon on the Pentecost; but also his historiographical work, his speeches and his theological production receive due attention. The book also tackles several aspects of Eustathios' style (proverbs, allusions, etc.), and the meaning of his work in the context of his historical moment. Addressed at specialists but also at graduate students with an interest in the reception of Classical antiquity and in Byzantine civilisation, the volume gathers papers by leading scholars from various countries, and it opens up new paths of research in several areas of philology and history, above all by interweaving and juxtaposing Eustathios' dimension as an Homerist and an immensely learned classical scholar with his capacities as an orator, a highly praised teacher, a rhetorically refined writer of Greek prose, an historian of his own turbulent times, and an archbishop who had to fulfil his everyday duties.

The past decade has seen an exponential increase in our knowledge and understanding of adipose tissue biology. This has coincided with the continued rise in obesity across all generations. Clearly despite substantial advances in research into adipose tissue this still has had limited impact on the on-going obesity epidemic across a majority of countries in the world. This book brings together many leading experts in the field to provide an up to date and comprehensive review of the key aspects of adipose tissue. It therefore includes chapters on evolution, development and inflammation together with a detailed review of brown and beige adipose tissue biology and their potential significance in preventing or combating obesity. These chapters are complemented by those on genetics and gender influences, together with nutrition through the life cycle. Ultimately the book provides an overview of the complexities of adipose tissue biology and the continuing challenge to combat obesity in the 21st century.

Conceived as a necessary reconsideration of the pristine "elegiac question" in Ovid's Metamorphoses, this book intends to offer an analysis of the function of elegiac discourse within Ovid's magnum opus from the perspective of metapoetics. To that end, the author undertakes, in the first section, a close re-reading of some relevant passages of Latin love elegy. From a prism that takes into account the characteristically elegiac multivocality, the genre reveals itself as an agonistic discourse in which the poet dramatizes his metaliterary power-relation with the puella, who is unveiled as the synthesis of the distinct sub-products of his poetic activity. Thereupon, the author proceeds to scrutinise how elegiac elements are assimilated and transformed as they become integrated within the framework of Ovid's poem of changing forms. Far from being a mere stylistic ornament, the presence of an elegiac register in many erotic passages tells us about Ovid's stance towards love as a metapoetic trope. By reworking elegiac tradition to the point of transforming it into a novum corpus, the poet ultimately substantiates the mutability of generic categories.

This collection includes thirty scholarly essays on Homer and Greek epic poetry published by Margalit Finkelberg over the past three decades. The topics discussed reflect the author's research interests and represent the main directions of her contribution to Homeric studies: Homer's language and diction, archaic Greek epic tradition, Homer's world and values, transmission and reception of the Homeric poems. The book gives special emphasis to some of the central issues in contemporary Homeric scholarship, such as oral-formulaic theory and the role of the individual poet; Neanalysis and the character of the relationship between Homer and the tradition about the Trojan War; the multi-layered texture of the Homeric poems; the Homeric Question; the canonic status of the Iliad and the Odyssey in antiquity and modernity. All the articles are revised and updated. The book addresses both scholars and advanced students of Classics, as well as non-specialists interested in the Homeric poems and their journey through centuries.
