The Invention of Murder is painstakingly researched. So much so that 20% of the book is given over to acknowledgments. I found many of the stories, though, to be repetitive and formulaic in their telling and would have welcomed more of the author's rare asides and personal comments to lift this.

The Invention of Murder by Judith Flanders tells about the infamous and lesser known gruesome crimes of the nineteenth century, and how it shaped the book and entertainment industries of the time. Many parts of this book were fascinating, especially the way the crimes are written about. I really disliked the awkward flow of the book though.

"Superb... Flanders's convincing and smart synthesis of the evolution of an official police force, fictional detectives, and real-life cause célèbres will appeal to devotees of true crime and detective fiction alike." -Publishers Weekly, starred review

In this fascinating exploration of murder in nineteenth century England, Judith Flanders examines some of the most gripping cases that captivated the Victorians and gave rise to the first detective fiction. Murder in the nineteenth century was rare. But murder as sensation and entertainment became ubiquitous, with cold-blooded killings transformed into novels, broadsides, ballads, opera, and melodrama—even into puppet shows and performing dog-acts. Detective fiction and the new police force developed in parallel, each imitating the other—the founders of Scotland Yard gave rise to Dickens's Inspector

Bucket, the first fictional police detective, who in turn influenced Sherlock Holmes and, ultimately, even P.D. James and Patricia Cornwell. In this meticulously researched and engrossing book, Judith Flanders retells the gruesome stories of many different types of murder in Great Britain, both famous and obscure: from Greenacre, who transported his dismembered fiancée around town by omnibus, to Burke and Hare's bodysnatching business in Edinburgh; from the crimes (and myths) of Sweeney Todd and Jack the Ripper, to the tragedy of the murdered Marr family in London's East End. Through these stories of murder-from the brutal to the pathetic-Flanders builds a rich and multi-faceted portrait of Victorian society in Great Britain. A compelling and remarkable history spanning two thousand years of murder, from the 'games' of ancient times to modern day cannibal killers, including coverage on random 'spree' gunmen as well as the growing phenomenon of murder with an element of the occult.

From the National Book Award-winning author of *Slaves in the Family*, a riveting true life/true crime narrative of the partnership between the murderer who invented the movies and the robber baron who built the railroads. One hundred and thirty years ago Eadweard Muybridge invented stop-motion photography, anticipating and making possible motion pictures. He was the first to capture time and play it back for

an audience, giving birth to visual media and screen entertainments of all kinds. Yet the artist and inventor Muybridge was also a murderer who killed coolly and meticulously, and his trial is one of the early instances of a media sensation. His patron was railroad tycoon (and former California governor) Leland Stanford, whose particular obsession was whether four hooves of a running horse ever left the ground at once. Stanford hired Muybridge and his camera to answer that question. And between them, the murderer and the railroad mogul launched the age of visual media. Set in California during its frontier decades, The Tycoon and the Inventor interweaves Muybridge's quest to unlock the secrets of motion through photography, an obsessive murder plot, and the peculiar partnership of an

eccentric inventor and a driven entrepreneur. A tale from the great American West, this popular history unspools a story of passion, wealth, and sinister ingenuity.

On July 28, 1841, the body of Mary Rogers, a twenty-year-old cigar girl, was found floating in the Hudson-and New York's unregulated police force proved incapable of solving the crime. One year later, a struggling writer named Edgar Allan Poe decided to take on the case-and sent his fictional detective, C. Auguste Dupin, to solve the baffling murder of Mary Rogers in "The Mystery of Marie Rog t."

Roger Lane simply asks the same questions of the past that we ask of the present: What causes murder rates to go up or

down? How efficiently or fairly has the justice system worked in dealing with homicide? What are or have been the roles of economic difference and family structure, of the courts and the media, of the Wild West and the urban Industrial Revolution, of Indian warfare and African-American slavery? But if the questions are familiar, Lane shows us that the answers cannot be fitted neatly into boxes we now label either "liberal" or "conservative." They will surprise most readers.

An entertaining and informative look at the unique culture of crime, punishment, and killing in Ancient Rome In Ancient Rome, all the best stories have one thing in common—murder. Romulus killed Remus to found the city, Caesar was

assassinated to save the Republic. Caligula was butchered in the theater, Claudius was poisoned at dinner, and Galba was beheaded in the Forum. In one 50-year period, 26 emperors were murdered. But what did killing mean in a city where gladiators fought to the death to sate a crowd? In *A Fatal Thing Happened on the Way to the Forum*, Emma Southon examines a trove of real-life homicides from Roman history to explore Roman culture, including how perpetrator, victim, and the act itself were regarded by ordinary people. Inside Ancient Rome's darkly fascinating history, we see how the Romans viewed life, death, and what it means to be human.

area's furnishings and decorations while recounting events that may have transpired in the parlor, master bedroom, scullery, sickroom, and more. By the author of *A Circle of Sisters*.

This pioneering work is the first to trace how our understanding of the causes of human behavior has changed radically over the course of European and American cultural history since 1830. Focusing on the act of murder, as documented vividly by more than a hundred novels including *Crime and Punishment*, *An American Tragedy*, *The Trial*, and *Lolita*, Stephen Kern devotes each chapter of *A Cultural History of Causality* to examining a specific causal factor or motive for murder--ancestry, childhood, language, sexuality,

emotion, mind, society, and ideology. In addition to drawing on particular novels, each chapter considers the sciences (genetics, endocrinology, physiology, neuroscience) and systems of thought (psychoanalysis, linguistics, sociology, forensic psychiatry, and existential philosophy) most germane to each causal factor or motive. Kern identifies five shifts in thinking about causality, shifts toward increasing specificity, multiplicity, complexity, probability, and uncertainty. He argues that the more researchers learned about the causes of human behavior, the more they realized how much more there was to know and how little they knew about what they thought they knew. The book closes by considering the revolutionary impact of quantum theory, which, though it influenced novelists only marginally, shattered the model of

causal understanding that had dominated Western thought since the seventeenth century. Others have addressed changing ideas about causality in specific areas, but no one has tackled a broad cultural history of this concept as does Stephen Kern in this engagingly written and lucidly argued book.
