David Lodge seems to me like a true genius, perhaps because he can make his incredibly clever and erudite novels accessible to ordinary readers. It's a travesty that he's never been awarded a Booker. This book is fascinating in the way it introduces concepts like Artificial Intelligence and Cognitive Science.

David Lodge has always been a bit of a "cult" writer. some of his other recent books were disappointing but Thinks... is a welcome return to form. The book centers around the Ralph Messenger, a cognitive scientist at a British university and Helen Reed a recently widowed writer who is also on campus.
