Trust the market-leading ESSENTIALS OF STATISTICS FOR BUSINESS AND ECONOMICS, 8E to introduce sound statistical methodology using real-world examples, proven approaches, and hands-on exercises that build the foundation readers need to analyze and solve business problems quantitatively. This edition gives readers the foundation in statistics needed for an edge in today's competitive business world. The authors' signature problem-scenario approach and reader-friendly writing style combines with proven methodologies, hands-on exercises, and real examples to take readers deep into today's actual business problems. Readers learn how to solve problems from an intelligent, quantitative perspective. Streamlined to focus on core topics, this new edition provides the latest updates with new case problems, applications, and self-test exercises to help readers master key formulas and apply statistical methods as they learn them. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

In many penetration tests, there is a lot of useful information to be gathered from the radios used by organizations. These radios can include two-way radios used by guards, wireless headsets, cordless phones and wireless cameras. Wireless Reconnaissance in Penetration Testing describes the many ways that a penetration tester can gather and apply the information available from radio traffic. Stopping attacks means thinking like an attacker, and understanding all the ways that attackers gather information, or in industry terms profile, specific targets. With information from what equipment to use and how to find frequency information, to tips for reducing radio information leakage, to actual case studies describing how this information can be used to attack computer systems, this book is the go-to resource for penetration testing and radio profiling. Author Matthew Neely is a respected and well-known expert and speaker on radio reconnaissance and penetration testing Includes real-world case studies of actual penetration tests using radio profiling Covers data leakage, frequency, attacks, and information gathering

Active Communication Education (ACE) is a communication awareness and training programme for older people with acquired hearing loss. It provides health professionals working in the community with a step-by-step programme for running a group education programme for older people with hearing impairment and their partners.

This book translates knowledge about persuasion into evidence-based principles. Useful knowledge about persuasion has been obtained over the last 100 years from the experience of advertising experts and from empirical studies in advertising and other fields including psychology, consumer behavior, law, mass communication, politics, and propaganda. The principles in Persuasive Advertising provide understandable and easy-to-access guidance for all types of advertising, including still media such as print and Internet, and motion media such as TV, streaming video, Internet, and radio. They also apply to other types of persuasive communications such as management reports, speeches, and press releases. Wharton School Professor J. Scott Armstrong spent over 16 years on this book. In recent years, he was assisted by Gerry Lukeman, Chairman Emeritus of Ipsos-ASI and Sandeep Patnaik, Research Director at Gallup and Robinson. Altogether, more than 80 people contributed to Persuasive Advertising by obtaining relevant studies, analyzing data, editing and reviewing, and surveying researchers to ensure that the book correctly summarizes their findings. Persuasive Advertising summarizes findings from about 3,000 empirical studies and 50 books. It also presents new findings from previously unpublished studies. . Along with the AdPrin Audit software on AdPrin.com, Persuasive Advertising enables advertisers as well as agencies to quickly and inexpensively identify ways to improve ads - or to determine which of a set of ads will be most effective. For example, it typically requires about an hour for an experienced user to obtain a persuasiveness index for a print ad along with a list of ways to improve the ad. . By using these principles, advertisers can improve their creativity and effectiveness. This book is supported by the AdPrin.com site: <http://advertisingprinciples.com/>

"Bluetooth (enabled devices) will ship in the billions of units once it gains momentum." - Martin Reynolds, Gartner Group Bluetooth is the most exciting development in wireless computing this decade! Bluetooth enabled devices can include everything from network servers, laptop computers and PDAs, to stereos and home security systems. Most Bluetooth products to hit the market in 2001 will be PC cards for laptop computers and access points, which allow up to seven Bluetooth devices to connect to a network. Reports indicate that by the end of 2003 there will be over 2 billion Bluetooth-enabled devices. Bluetooth-enabled devices communicate with each other through embedded software applications. Bluetooth Developer's Guide to Embedded Applications will provide embedded applications developers with advanced tutorials and code listings written to the latest Bluetooth's latest specification, version 1.1. Written by Bluetooth pioneers from market leaders in Bluetooth software development, Extended Systems and Cambridge Silicon Radio, this is the first advanced level Bluetooth developer title on the market. White Hot Topic While other books introduce readers to the possibilities of Bluetooth, this is the first comprehensive, advanced level programming book written specifically for embedded application developers Authors are responsible for SDK, the market-leading development tool for Bluetooth Comes with Syngress' revolutionary Credit Card CD containing a printable HTML version of the book, all of the source code and sample applications from Extended Systems and Cambridge Silicon Radio

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

This is the perfect playdate for your purse. Are you a multi-tasking mom pulled in a million directions by your precocious kids, demanding boss and starved-for-attention spouse? Do you find the only time you're able to steal a moment to yourself is behind the doors of a bathroom stall? If so, then you are in desperate need of a playdate with Peeing in Peace. Honest and unafraid to talk about working motherhood's dirty secrets, such as bribing, potty (mouth) training, and going to the office to relax, working moms Beth Feldman and Yvette Manessis Corporon offer community, chuckles, and co-conspirators for busy moms everywhere. Packed with stories, tips, and even a recipe or two, Peeing in Peace will help you navigate the choppy waters of work, home, and the chaos in between. So grab a latte, enjoy the quiet, and dive in! "A must-read for any mom who needs a little boost while trying to juggle business and babies." Barbara Corcoran, real estate mogul and author "Peeing in Peace had me smiling from start to finish." Marg Helgenberger, CSI television star and feature film actress "Peeing in Peace is the perfect remedy for overwhelmed moms." -Melanie Lynne Hauser, author of Confessions of Super Mom
