WARRIOR POLITICS: WHY LEADERSHIP DEMANDS A PAGAN ETHOS Robert D. Kaplan Random House, 2002, xxii + 198 pgs. The dust jacket of Mr. Kaplan's book made me suspicious. Henry Kissinger, that vest-pocket Bismarck, I calls the book "one of the most thought-provoking and profound . . . that I have ever read." John Gray, whom I have reviewed several times in these pages with incomplete sympathy, concurs: he speaks of a "profound and timely meditation."

"The side that knows when to fight and when not will take the victory. There are roadways not to be traveled, armies not to be attacked, walled cities not to be assaulted." —Sun-Tzu We live in dangerous times, when a new kind of leadership is required. Visionary and ruthlessly strategic, Warrior Politics extracts the best of the wisdom of the ages for modern leaders who are faced with the complex life-and-death challenges of today's world—and determined to win. Sun-Tzu urges leaders to "plan and calculate like a hungry man." Machiavelli defines a policy not by its excellence but by its outcome. Churchill derives his greatness from his imagination of history. Livy shows that the vigor to face down adversaries must ultimately come from pride in our own past achievements. "Never mind if they call your caution timidity, your wisdom sloth, your generosity weakness," he writes. "It is better that a wise enemy should fear you than that foolish friends should praise." "Men often oppose a thing merely because they have no agency in planning it," Alexander Hamilton says, "or because it may have been planned by those whom they dislike." Replete with maxims, warnings, examples from history, and shrewd recommendations, Warrior Politics wrests from the past the lessons we need to arm ourselves for the present. It offers an invaluable template for any decision-maker—in foreign policy or in business—faced with high stakes and inadequate knowledge of a mine-filled terrain. As we gear ourselves up for a new kind of war, no book is more prescient, more shrewd, or more essential.

A journalist and best-selling author of Imperial Grunts offers a close-up study of the American military on land, in the air, and at sea, furnishing a ground-level profile of the global war on terrorism, as well as how the U.S. Navy protects sea lanes, provides disaster relief, and prepares for a confrontation with China, while the Air Force prepares for war with Iran and North Korea. Reprint. 50,000 first printing.

Rich, intriguing history from a leading scholar of early modern Europe, bringing alive the wars and armies that shaped the continent's path out of the Dark Ages to modernity

NAMED ONE OF THE BEST BOOKS OF THE YEAR BY FINANCIAL TIMES From Robert D. Kaplan, named one of the world's Top 100 Global Thinkers by Foreign Policy magazine, comes a penetrating look at the volatile region that will dominate the future of geopolitical conflict. Over the last decade, the center of world power has been quietly shifting from Europe to Asia. With oil reserves of several billion barrels, an estimated nine hundred trillion cubic feet of natural gas, and several centuries' worth of competing territorial claims, the South China Sea in particular is a simmering pot of potential conflict. The underreported military buildup in the area where the Western Pacific meets the Indian Ocean means that it will likely be a hinge point for global war and peace for the foreseeable future. In Asia's Cauldron, Robert D. Kaplan offers up a vivid snapshot of the nations surrounding the South China Sea, the conflicts brewing in the region at the dawn of the twenty-first century, and their implications for global peace and stability. One of the world's most perceptive foreign policy experts, Kaplan interprets America's interests in Asia in the context of an increasingly assertive China. He explains how the region's unique geography fosters the growth of navies but also impedes aggression. And he draws a striking parallel

between China's quest for hegemony in the South China Sea and the United States' imperial adventure in the Caribbean more than a century ago. To understand the future of conflict in East Asia, Kaplan argues, one must understand the goals and motivations of its leaders and its people. Part travelogue, part geopolitical primer, *Asia's Cauldron* takes us on a journey through the region's boom cities and ramshackle slums: from Vietnam, where the superfueled capitalism of the erstwhile colonial capital, Saigon, inspires the geostrategic pretensions of the official seat of government in Hanoi, to Malaysia, where a unique mix of authoritarian Islam and Western-style consumerism creates quite possibly the ultimate postmodern society; and from Singapore, whose "benevolent autocracy" helped foster an economic miracle, to the Philippines, where a different brand of authoritarianism under Ferdinand Marcos led not to economic growth but to decades of corruption and crime. At a time when every day's news seems to contain some new story—large or small—that directly relates to conflicts over the South China Sea, *Asia's Cauldron* is an indispensable guide to a corner of the globe that will affect all of our lives for years to come. Praise for *Asia's Cauldron* "Asia's Cauldron is a short book with a powerful thesis, and it stands out for its clarity and good sense. . . . If you are doing business in China, traveling in Southeast Asia or just obsessing about geopolitics, you will want to read it."—The New York Times Book Review "Kaplan has established himself as one of our most consequential geopolitical thinkers. . . . [*Asia's Cauldron*] is part treatise on geopolitics, part travel narrative. Indeed, he writes in the tradition of the great travel writers."—The Weekly Standard "Kaplan's fascinating book is a welcome challenge to the pessimists who see only trouble in China's rise and the hawks who view it as malign."—The Economist "Muscular, deeply knowledgeable . . . Kaplan is an ultra-realist [who] takes a non-moralistic stance on questions of power and diplomacy."—Financial Times

*Eastward to Tartary*, Robert Kaplan's first book to focus on a single region since his bestselling *Balkan Ghosts*, introduces readers to an explosive and little-known part of the world destined to become a tinderbox of the future. Kaplan takes us on a spellbinding journey into the heart of a volatile region, stretching from Hungary and Romania to the far shores of the oil-rich Caspian Sea. Through dramatic stories of unforgettable characters, Kaplan illuminates the tragic history of this unstable area that he describes as the new fault line between East and West. He ventures from Turkey, Syria, and Israel to the turbulent countries of the Caucasus, from the newly rich city of Baku to the deserts of Turkmenistan and the killing fields of Armenia. The result is must reading for anyone concerned about the state of our world in the decades to come.

By providing a critical interpretation of political leadership during the Northern Ireland peace process, Gormley-Heenan shows the 'leadership lens' offers insights not offered by conventional analyses of peacemaking processes. The book discusses the confusions, contradictions and chameleonic nature of leadership and its role, capacity and effect.

With armed conflict in the Persian Gulf now upon us, Harvard archaeologist Steven LeBlanc takes a long-term view of the nature and roots of war, presenting a controversial thesis: The notion of the "noble savage" living in peace with one another and in harmony with nature is a fantasy. In *Constant Battles: The Myth of the Peaceful, Noble Savage*, LeBlanc contends that warfare and violent conflict have existed throughout human history, and that humans have never lived in ecological balance with nature. The start of the second major U.S. military action in the Persian Gulf, combined with regular headlines about spiraling environmental destruction, would tempt anyone to conclude that humankind is fast approaching a catastrophic end. But as LeBlanc brilliantly argues, the archaeological record shows that the warfare and ecological destruction we find today fit into patterns of human behavior that have gone on for millions of years. *Constant Battles* surveys human history in terms of social organization—from hunter gatherers, to tribal agriculturalists, to more complex societies. LeBlanc takes the reader on his own digs around the world -- from New Guinea to the Southwestern U.S. to Turkey -- to show how he has come to discover warfare everywhere at every time. His own fieldwork combined with his archaeological, ethnographic, and historical research, presents a riveting account of how, throughout human history, people always have outgrown the carrying capacity of their environment, which has led to war. Ultimately, though, LeBlanc's point of view is reassuring and optimistic. As he explains the roots of warfare in human history, he also demonstrates that warfare today has far less impact than it did in the past. He also argues that, as awareness of these patterns and the advantages of modern technology increase, so does our ability to avoid war in the future.

The author of *Balkan Ghosts* draws on the historical wisdom of Sun-Tzu, Thucydides, Hobbes, Machiavelli, and other great thinkers to provide valuable guidelines for modern-day world leaders--in both politics and business environments--confronted with the complex challenges of modern life. Reprint. 60,000 first printing.

When it was first published in 1992, the first edition of *Leadership for the Common Good* presented a revolutionary approach to community and organizational leadership in a shared-power world. Now, in this completely revised and updated edition, Barbara Crosby and John Bryson expand on their proven leadership model and offer new insights and guidance to leaders. This second edition is a practical resource for a new generation of leaders and aspiring leaders and includes success stories, challenges, and real-world experience.

*Famine in the Horn* is both a tool and an aspect of ethnic conflict, with the Ethiopian Amharas of the central highlands pitted against the Eritreans and Tigreans of the north. The overwhelming majority of U.S. journalists have reported on Ethiopia from one side only—that of the Amharas in Addis Ababa. The author wants to show the story from the other side, in order to redress a grievous imbalance in news coverage. To get people excited, you sometimes have to light a fire, and that was the author's intention. This book covers the period from late 1984 to the early part of 1987. In late 1987, the famine returned, mainly for the very reasons cited inside.
